DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest the claimed transducer for being remotely positioned in a fluid within a vessel and for sensing a pressure generated by the fluid in the vessel, the transducer having an antenna for capturing an externally-generated interrogation signal and for transmitting a response signal; a response circuit coupled to the antenna for receiving the interrogation signal and for generating the response signal in response to the interrogation signal; and a sensor coupled to the response circuit for sensing the pressure generated by the fluid and adjusting one or more electrical characteristics of the response circuit in relation to the sensed pressure; wherein the response circuit causes a delay in the generation of the response signal so that the response signal is transmitted at a time separated from and following a transmission of artifacts of the interrogation signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record on the attached PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.
